

Community Support Contributions: 2012

AstraZeneca Canada is proud to provide support to many different charitable and non-profit organizations across Canada. In 2012, we invested almost \$16 million in health initiatives with Canadian charities and non-profit organizations. Our global Community Support Policy focuses our community investment on healthcare in our local communities and in vulnerable communities or to support science education for young people. Exceptions are permissible with senior manager approval.

AstraZeneca is committed to publicly disclosing information about the charitable and non-profit organizations we support with funding, in-kind donations and international product donations. AstraZeneca Canada adheres to the Imagine Caring Company standard for corporate giving and is a member of LBG (London Benchmarking Group) Canada. Our reporting is in line with LBG Canada standards.

If you have questions about the information contained in this document or about AstraZeneca Canada's community support activities, please contact us at corp-responsibility@astrazeneca.com.

Employee Giving and Volunteering Program

AstraZeneca Canada is pleased to support the giving and volunteer activities of its employees through its Volunteer Investment Program (VIP). VIP matches the donations employees make to registered charities up to a maximum of \$500 per employee; provides volunteer grants of \$500 to registered charities where employees have volunteered a minimum of 40 hours; supports team fundraising to a maximum of \$1,000; provides sponsorship of \$250 to sports teams and community groups with non-profit status where employees volunteer their time as coaches, mentors, fundraisers or board members; and lastly, provides up to two days of release time for employees to volunteer with the charity of their choice. The organizations listed below have received funding support from AstraZeneca through VIP.

Product Donations

Internationally, we donate our products through [Health Partners International of Canada](#) (HPIC), a Montréal-based charitable organization that provides much needed medicines, vaccines, medical supplies and devices for use by humanitarian or disaster relief missions in developing countries. Our products are included in HPIC's Physician Travel Packs (PTP) and we respond to special requests from physicians traveling on humanitarian missions overseas.

In 2012, we donated close to \$2.2 million worth of medicines to HPIC. Our medicines were used by physicians on humanitarian missions to Guatemala, Somalia, Ecuador, Gambia, North Korea, Burundi and the Philippines. We completed a significant donation of Bicalutamide (Casodex) to El Salvador and Morocco. The donation was distributed through Plan Canada in conjunction with the Ministry of Health in El Salvador to support 625 healthcare facilities treating over 74.5% of the population. The Moroccan donation was facilitated through Human Concern International and distributed through the Fondation Marocaine pour la Jeunesse Initiative et le Developpement in Casablanca,

Morocco. The MJID works through public hospitals dealing with Diabetes, Kidney Disease and Cancer. We continued to contribute product to HPIC's Physician Travel Pack program and to support HPIC's Capacity Building and Access to Medicines Project in Afghanistan.

NeoMed

In 2012, we made a significant investment in partnership with the Government of Quebec and Pfizer Canada to support the creation of the NeoMed Institute – a new life sciences research centre.

The NeoMed Institute is a non-profit research consortium that aims to bridge the “innovation gap” that exists between basic research and later stage drug development – helping to successfully commercialize early stage research from the laboratory into a proven medicine. Occupying the former AstraZeneca Research & Development (AZRDM) facility in Montréal; the NeoMed Institute will act as a “hub” where stakeholders in the R&D chain – universities, pharmaceutical companies, biotechs, venture capital and contract research organizations (CRO) – will be co-located to stimulate collaboration and innovation.

This investment included the donation of our entire neuroscience basic research centre to the NeoMed Institute (including land, building and laboratory equipment); the donation of intellectual property to three AstraZeneca pain projects; and a cash donation of \$5 million to support the activities of the Institute during its initial five years of operation.
